Postal Code

By checking the below box you agree to have read these terms and agree to, Hey come back and continue reading not all agreements are safe to agree to blindly.

☐ agree

It is required to implement the following validation rules and display appropriate error messages:

- ✓ 0- Read the following carefully, as they contain the validation rules you should add.
- ✓ 1- All input fields need to contain information
- ✓ 2- First name max 35 characters
- ✓ 3- Last name max 13 characters
- ✓ 4- First and last name should only have English characters and space.
- ✓ 5- The email field should have correct email format.
- ✓ 6- Phone number should be a valid Egyptian **mobile** number

- ✓7- One of the registered years is registered (other than the select year option)
- ✓8- One of the departments is selected
- ✓9- The postal code should be a postal code format (It differs from country to country, so choose a country and write it in an HTML comment near it, and then add a validation for it that follows the postal code format of the country you chose)
- ✓10- Make sure the user agrees

Rules

Don't use jquery only use javascript. Add name, id, functions or scripts to the HTML as you see fit. The main goal is to add validation to this form in the manner described above.

Rename your HTML file to your_ID.html
